* OPDs will receive the PAPE (clinical visit rate/facility rate) for this service. OPDs cannot bill separately for services provided by mid-level providers, this will be included in the facility rate. This means they will use only Service Code 99407 with TF and HQ modifiers.

Modifiers:
- TF = intermediate level of care
- SB = nurse midwife
- U1 = defined for use by “tobacco cessation counselor”
- U2 = defined for use as “intake assessment, non-physician provider employed by physician”
- U3 = defined for use as “group visit, non-physician provider employed by physician”

Information for Providers about Tobacco Cessation Benefits through MassHealth and Commonwealth Care

Other Counseling Options
- Because face-to-face counseling may not be available immediately or in all locations, and to accommodate patient preferences, healthcare providers may also assist members in quitting by:
  - referring patients to the free Massachusetts Smokers’ Helpline at 1-800-QUIT-NOW (1-800-784-8669) and in Spanish at 1-800-8-DEJALO (1-800-833-5256).
  - referring patients to the free telephonenumber-based QuitWorks program, offered by the Massachusetts Department of Public Health through the Massachusetts Smokers’ Helpline. Download a referral form from www.quitworks.org.

Medications and Counseling Covered
- All FDA-approved medications, two 90-day treatment regimens per year.
- The pharmacotherapy benefit allows a 90-day supply of medications for Nicotine Replacement Therapy (NRT) per cessation attempt (patch, gum, lozenge), with a maximum of two 90-day treatment regimens per year. Higher amounts of medications are available with prior authorization.
- The pharmacotherapy benefit also covers other medically necessary drugs for tobacco cessation such as bupropion (the generic form of Zyban) and Chantix (generic drug name varenicline). These medications are covered for a maximum of two 90-day treatment regimens per year (roughly two 12-week courses of treatment, for a total of 24 weeks of coverage). Higher amounts of medications are available with prior authorization.
- Up to 16 face-to-face counseling sessions per 12-month cycle. Members may receive up to 16 face-to-face counseling sessions per year. These 16 sessions can include any combination of two 45-minute intake/assessment sessions per year and 14 sessions of either individual or group counseling. More counseling may be available with prior authorization.

Covered Medications
- Prior authorization is not required to prescribe the nicotine patch, gum, lozenge, or bupropion. Some Commonwealth Care members may need prior authorization for Chantix, the nicotine inhaler and/or the nicotine spray. MassHealth members need prior authorization for the nicotine inhaler and/or the nicotine spray. MassHealth requires prior authorization for additional NRT or medication beyond the two 90-day treatment regimens, but some Commonwealth care plans do not.
- For more information on the MassHealth pharmacotherapy benefit, see the MassHealth Drug List at www.mass.gov/druglist. It can also be accessed from the MassHealth Pharmacy home page at www.mass.gov/masshealth/pharmacy. For Commonwealth Care members, contact the member’s specific plan.

How do members access medications for tobacco cessation?
- The member must have a prescription from their provider for the tobacco cessation medication in order to obtain coverage. Even though some of these medications (the patch, gum, or lozenges) are available over-the-counter, members must present the prescription to their pharmacy in order for the cost of the medications to be covered. Co-payments apply to tobacco cessation medications. Co-payments vary from $0 to $3.65 depending on the medication and the members’ health plan.

Will MassHealth and Commonwealth Care cover a combination of tobacco cessation medications?
- Yes. MassHealth and Commonwealth Care will cover a combination of medications (for example, patch and gum; bupropion and patch) as part of the tobacco cessation benefit.

Where can I find a quick reference/dosing guide for tobacco cessation medications?
- A free pocket dosing guide can be downloaded or ordered at www.quitworks.org (click on “Tools and Resources”). Bulk orders are accepted.
Tobacco Cessation Counseling
Where can providers offer MassHealth and Commonwealth Care members for tobacco cessation counseling services?
- Members may be referred to a qualified tobacco cessation counselor within the same facility, or to another facility with a qualified provider where the member’s desired counseling option (group or individual counseling) is available.
- Members should contact their health plan’s Member Services Department directly to find qualified counselors in their area.

Are brief provider interventions covered?
- The tobacco cessation benefit includes individual counseling provided for at least 30 minutes (see Table 1). Individual counseling provided for less than 30 minutes is not covered by the benefit. MassHealth and Commonwealth Care strongly encourage providers to briefly discuss the tobacco cessation benefit with members when reviewing the counseling and pharmacotherapy options that members have. This could include asking about the patient’s smoking status, encouraging them to quit, and offering a combination of pharmacotherapy and counseling services.

What is the intake and assessment component of the counseling benefit and why is it 45 minutes?
- A structured intake and assessment session specific to tobacco treatment is a key to effective treatment planning and can take 45 minutes. Such an assessment typically includes a smoking, medical, and psychosocial history, and incorporates review of coping skills, barriers to quitting and collaboration on treatment planning. A tobacco cessation intake and assessment protocol is available from UMass Medical School. UMass Medical School will also develop online and in-person training options to assist providers with this component. For information, e-mail the UMass Medical School Center for Tobacco Treatment Research and Training at cttrt@umassmed.edu.

Can tobacco cessation counseling be offered and billed on the same day that a patient presents for other procedures, office visit, or appointments?
- Yes. Providers can provide and bill tobacco cessation counseling on the same day that an office visit or procedure is billed for the same patient.

Providers Qualified To Offer Cessation Counseling
Who can bill MassHealth and/or Commonwealth Care for providing tobacco cessation counseling?
- Community health centers (CHC), physicians (PHY), and acute outpatient hospital departments (OPD) can bill for providing tobacco cessation counseling services to covered members. Included within the category of physician are any MDs, such as primary care physicians, psychiatrists, and specialty physicians. To bill MassHealth, CHCs, PHYs, and OPDs must be enrolled with MassHealth.
- Specific clinical providers eligible to provide the counseling service are physicians, nurse practitioners, nurse midwives, registered nurses, physicians’ assistants, and qualified tobacco cessation counselors. All non-physician providers must be under the supervision of a physician, except independent nurse practitioners and independent nurse midwives providing the tobacco cessation counseling services directly.

What is a “qualified” tobacco cessation counselor?
- A “qualified” tobacco cessation counselor is someone who has completed at least eight hours of training in tobacco cessation services from an accredited institute of higher education.

Can substance abuse and mental health facilities participate in this new benefit?
- Eligible members may access tobacco cessation medications by having their primary care provider or other qualified physician write a prescription. Substance abuse facilities and mental health clinics may not obtain payment from MassHealth or Commonwealth Care for tobacco cessation counseling services at this time. Members may receive counseling from their primary care clinician or a qualified member of the clinical team in their community health center, physician’s office, or hospital department.
- For more information from MassHealth about the tobacco cessation benefit, call MassHealth Customer Service at 1-800-841-2000 or e-mail providersupport@mahealth.net.
- For more information from Commonwealth Care about the tobacco cessation benefit in general, call the Commonwealth Care Customer Service Center at 1-877-MA-ENROLL (1-877-623-6765).

Where can staff receive training to become qualified counselors?
- A 12-hour CEU program, Basic Skills for Working with Smokers, is available online through the University of Massachusetts Medical School Center for Tobacco Treatment Research and Training. The cost is $150. The Center also offers intensive four-day certification training for tobacco treatment specialists. Please see the Center’s website for more information at www.umassmed.edu/tobacco.

* Members are covered for at least 16 face-to-face counseling sessions, using any combination of intake/assessment/planning, in-depth individual, or in-depth group counseling sessions for each member per 12-month cycle without prior authorization. Please contact the member’s health plan for specific benefit information.

Help for Providers:
- Training and Other Resources

What If I have questions about the benefit?
- For more information about MassHealth’s tobacco cessation benefit, call MassHealth Customer Service at 1-800-841-2000 or e-mail providersupport@mahealth.net.
- For more information about Commonwealth Care’s tobacco cessation benefit, contact the member’s specific health plan:
  - Boston Medical Center HealthNet Plan
    - 1-800-792-4355
    - provider.info@bmchp.org
  - CeltiCare Health Plan of Massachusetts
    - 1-866-895-1786
    - CeltiCareHealthPlan.com
  - Fallon Community Health Plan
    - 1-888-977-3247
    - askchp@fcchp.org
  - NeighborHealth Plan (NHP)
    - 1-855-444-6474 (toll-free)
    - nhp.org
    - Network Health
      - 1-888-257-1985
      - network-health.org

How can I obtain training or technical assistance to implement this benefit in my clinic or practice?
- Training and technical assistance for implementing this benefit is available through the University of Massachusetts Medical School.
For information on upcoming training (for example, conference calls, in person, or on-line trainings) e-mail the UMass Medical School Center for Tobacco Prevention and Control at cttrt@umassmed.edu.

Do all MassHealth and Commonwealth Care plans offer the same benefit?
- Yes. All MassHealth and Commonwealth Care plans, including the MassHealth Primary Care Plan (PCC), Plan, and the managed care organizations (MCOs) that currently serve MassHealth and/or Commonwealth Care members – Boston Medical Center HealthNet Plan, CeliCare, Fallon, Neighborhood Health Plan, and Network Health – offer the same counseling and medication benefit. Some MCOs may also offer additional services, usually with prior authorization.

Are telephone counseling or alternative medicine treatments covered?
- Telephone counseling and alternative medicine treatments (for example, hypnotherapy and acupuncture) are not covered under this benefit.

Who is eligible for the benefit?
- All Commonwealth Care members are eligible for the tobacco cessation benefit. MassHealth members currently served by MassHealth – Boston Medical Center HealthNet Plan, and the managed care organizations (MCOs) that currently serve MassHealth Basic, MassHealth Essential, and Family Assistance for children.
- Members covered by MassHealth Limited are only covered for emergency services and therefore are not eligible for tobacco cessation services. See 130 CMR 450.105 for more information about MassHealth coverage types.

For more information about Commonwealth Care’s tobacco cessation benefit, contact the member’s specific health plan:
- Boston Medical Center HealthNet Plan
  - 1-800-792-4355
  - provider.info@bmchp.org
- CeltiCare Health Plan of Massachusetts
  - 1-866-895-1786
  - CeltiCareHealthPlan.com
- Fallon Community Health Plan
  - 1-888-977-3247
  - askchp@fcchp.org
- NeighborHealth Plan (NHP)
  - 1-855-444-6474 (toll-free)
  - nhp.org
- Network Health
  - 1-888-257-1985
  - network-health.org

Who is eligible for the benefit?
- All Commonwealth Care members are eligible for the tobacco cessation benefit. MassHealth members who are not enrolled in the following coverage types are eligible for the tobacco cessation benefit: MassHealth Standard, Parenatal, Commonwealth Health, and Family Assistance for persons with HIV and for members who get direct coverage (not premium assistance) for MassHealth Basic, MassHealth Essential, and Family Assistance for children.
- Members covered by MassHealth Limited are only covered for emergency services and therefore are not eligible for tobacco cessation services. See 130 CMR 450.105 for more information about MassHealth coverage types.

Do all MassHealth and Commonwealth Care plans offer the same benefit?
- Yes. All MassHealth and Commonwealth Care plans, including the MassHealth Primary Care Provider (PCC) Plan, and the managed care organizations (MCOs) that currently serve MassHealth and/or Commonwealth Care members—Boston Medical Center HealthNet Plan, CeltaCare, Fallon, Neighborhood Health Plan, and Network Health—offer the same counseling and medication benefit. Some MCOs may also offer additional services, usually with prior authorization.

Are telephone counseling or alternative medicine treatments covered?
- Telephone counseling and alternative medicine treatments (for example, hypnotherapy and acupuncture) are not covered under this benefit.

Tobacco Cessation Counseling
Where can providers refer MassHealth and Commonwealth Care members for tobacco cessation counseling services?
- Members may be referred to a qualified tobacco cessation counselor within the same facility, or to another facility with a qualified provider where the member’s desired counseling option (group or individual counseling) is available.
- Members should contact their health plan’s Member Services Department directly to find qualified counselors in their area.

Are brief provider interventions covered?
- The tobacco cessation benefit includes individual counseling provided for at least 30 minutes (see Table 1). Individual counseling provided for less than 30 minutes is not covered by the benefit. MassHealth and Commonwealth Care strongly encourage providers to briefly discuss the tobacco cessation benefit with patients when reviewing the counseling and pharmacotherapy options that members have. This could include asking about the patient’s smoking status, encouraging them to quit, and offering a combination of pharmacotherapy and counseling services.

What is the intake and assessment component of the counseling benefit and why is it 45 minutes?
- A structured intake and assessment session specific to tobacco treatment is a key to effective treatment planning and can take 45 minutes. Such an assessment typically includes a smoking, medical, and psychosocial history, and incorporates review of coping skills, barriers to quitting, and collaboration on treatment planning. A tobacco cessation intake and assessment protocol is available from UMass Medical School. UMass Medical School will also develop online and in-person training options to assist providers with this component. For information, e-mail the UMass Medical School Center for Tobacco Treatment Research and Training at ctrt@umassmed.edu.

Can tobacco cessation counseling be offered and billed on the same day that a patient presents for other procedures, office visit, or appointments?
- Yes. Providers can provide and bill tobacco cessation counseling on the same day that an office visit or procedure is billed for the same patient.

Providers Qualified To Offer Cessation Counseling
Who can bill MassHealth and/or Commonwealth Care for providing tobacco cessation counseling?
- Community health centers (CHC), physicians (PHY), and acute outpatient hospital departments (OPD) can bill for providing tobacco cessation counseling services to covered members. Included within the category of physician are any MDs, such as primary care physicians, psychiatrists, and specialists. To bill MassHealth, CHCs, PHYs, and OPDs must be enrolled with MassHealth. Specific clinical providers eligible to provide the counseling service are physicians, nurse practitioners, nurse midwives, registered nurses, physicians’ assistants, and qualified tobacco cessation counselors. All non-physician providers must be under the supervision of a physician, except independent nurse practitioners and independent nurse midwives providing the tobacco cessation counseling services directly.

What is a “qualified” tobacco cessation counselor?
- A “qualified” tobacco cessation counselor is someone who has completed at least eight hours of training in tobacco cessation services from an accredited institute of higher education.

Can substance abuse and mental health facilities participate in this new benefit?
- Eligible members may access tobacco cessation medications by having their primary care provider or other qualified physician write a prescription. Substance abuse facilities and mental health clinics may not obtain payment from MassHealth or Commonwealth Care for tobacco cessation counseling services at this time. Members may receive counseling from their primary care clinician or a qualified member of the clinical team in their community health center, physician’s office, or hospital department.
- For more information from MassHealth about the tobacco cessation benefit, call MassHealth Customer Service at 1-800-841-2000 or e-mail providersupport@mahealth.net.
- For more information from Commonwealth Care about the tobacco cessation benefit in general, call the Commonwealth Care Customer Service Center at 1-877-MA-ENROLL (1-877-623-6765).

Where can staff receive training to become qualified counselors?
- A 12-hour CEU program, Basic Skills for Working with Smokers, is available online through the University of Massachusetts Medical School Center for Tobacco Treatment Research and Training. The cost is $150. The Center also offers intensive four-day certification training for tobacco treatment specialists. Please see the Center’s website for more information at www.umassmed.edu/tobacco.

- Training and technical assistance for implementing this benefit is available through the University of Massachusetts Medical School.
- For information on upcoming training (for example, in-person calls, in person, or on-line trainings) e-mail the UMass Medical School Center for Tobacco Prevention and Control at ctrt@umassmed.edu.
Information for Providers about Tobacco Cessation Benefits through MassHealth and Commonwealth Care

Other Counseling Options
• Because face-to-face counseling may not be available immediately or in all locations, and to accommodate patient preferences, healthcare providers may also assist members in quitting by:
  > referring patients to the free Massachusetts Smokers’ Helpline at 1-800-QUIT-NOW (1-800-784-8669) and in Spanish at 1-800-8-DEJALO (1-800-833-5256).

Medications and Counseling Covered
• All FDA-approved medications, two 90-day treatment regimens per year.
  The pharmacotherapy benefit allows a 90-day supply of medication for Nicotine Replacement Therapy (NRT) per cessation attempt (patch, gum, lozenge), with a maximum of two 90-day treatment regimens per year. Higher amounts of medications are available with prior authorization.

• The pharmacotherapy benefit also covers other medically necessary drugs for tobacco cessation such as bupropion (the generic form of Zyban) and Chantix (generic drug name varenicline). These medications are covered for a maximum of two 90-day treatment regimens per year (roughly two 12-week courses of treatment, for a total of 24 weeks of coverage). Higher amounts of medications are available with prior authorization.

• Up to 16 face-to-face counseling sessions per 12-month cycle. Members may receive up to 16 face-to-face counseling sessions per year. These 16 sessions can include any combination of two 45-minute intake/assessment sessions per year and 14 sessions of either individual or group counseling. More counseling may be available with prior authorization.

Covered Medications
Is prior authorization required to prescribe tobacco cessation medications?
• Prior authorization is not required to prescribe the nicotine patch, gum, lozenge, or bupropion. Some Commonwealth Care members may need prior authorization for Chantix, the nicotine inhaler and/or the nicotine spray. MassHealth members need prior authorization for the nicotine inhaler and/or the nicotine spray. MassHealth requires prior authorization for additional NRT or medication beyond the two 90-day treatment regimens, but some Commonwealth care plans do not.

• For more information on the MassHealth pharmacotherapy benefit, see the MassHealth Drug List at www.mass.gov/druglist. It can also be accessed from the MassHealth Pharmacy home page at www.mass.gov/masshealth/pharmacy. For Commonwealth Care members, contact the member’s specific plan.

How do members access medications for tobacco cessation?
• The member must have a prescription from their provider for the tobacco cessation medication in order to obtain coverage. Even though some of these medications (the patch, gum, and lozenge) are available over-the-counter, members must present the prescription to their pharmacy in order for the cost of the medications to be covered.
• Co-payments apply to tobacco cessation medications. Co-payments vary from $0 to $3.65 depending on the medication and the members’ health plan.

Will MassHealth and Commonwealth Care cover a combination of tobacco cessation medications?
• Yes. MassHealth and Commonwealth Care will cover a combination of medications (for example, patch and gum; bupropion and patch) as part of the tobacco cessation benefit.

Where can I find a quick reference/dosing guide for tobacco cessation medications?
• A free pocket dosing guide can be downloaded or ordered at www.quitworks.org (click on “Tools and Resources”). Bulk orders are accepted.
